

Environmental Sustainability Policy

This Environmental Sustainability Policy aims to integrate a philosophy of sustainable development into all Judo ACT's activities and to establish and promote sound environmental practice in our operations.

Judo ACT are committed to the principles of sustainable development and recognise our responsibilities to Judo and the wider community to make a contribution to minimise the impact of our operations on the environment and maximise the effective use of resources.

We will set objectives and targets and review them annually in order to improve our environmental performance and will regularly assess the environmental impacts of our operations.

Judo ACT commits itself to minimising its impact on our environment through:

- Having an environmentally sustainable aware culture, where responsibility is assigned and understood;
- Being an environmentally responsible neighbour in our community;
- Conserve energy, water, paper and other natural resources by reusing, recycling and minimising waste;
- Minimise materials and energy use, prevent air, water, and other pollution, and dispose of waste safely and responsibly;
- Participating in efforts to improve environmental protection and understanding;
- Taking steps to improve environmental performance continually;
- Conducting evaluations and self-assessments of the implementation of this policy;
- Comply with all relevant Australian Government and Territory environmental legislation, regulations, policies and initiatives;
- Enhancing awareness among our committee and volunteers – educating and motivating them to act in an environmentally responsible manner;
- Utilise particular knowledge and experience to contribute to environmentally sustainable techniques, technology, knowledge and methods for the sport;
- Act responsibly to correct incidents or conditions that endanger health, safety, or the environment.

We will promptly report any such incidents to the relevant authorities and inform affected parties as appropriate.
